TO : D.S.R.C.t Judge Ana L.Sa Torres

Date : Sept.

29, 2016

This is the record of allergic reaction incident that

Evidence

Substantiating occurred at Holly Hills Hospital in May of 2008. I was

claims

given Cognitoin and P.O. to counter the reaction I had

to Haldol (my throat closed up and I couldn't breathe), in

still waiting for the records from Cape Fear and Dorsettian

D:X showing how long its been on record that I am

allergic to this medication that M.D. France chagut

ordered to have me forcefully injected with, against

my wishes.

Thank you,

D.S.R.C.t Judge: A.T.

Magistrate Judge: J.F.

Docket #: 16cv02517

HOLLY-HILL BEHAVIORAL HEALTH SYSTEM
RALEIGH, NORTH CAROLINA

PATIENT NAME: LURCH, ROBERT
MEDICAL RECORD #: 41844
ADMISSION DATE: 05/26/2008
DISCHARGE DATE: 06/03/2008

Page 1

DISCHARGE SUMMARY

IDENTIFYING INFORMATION: Robert is a 17-year-old single African-American male from Fort Bragg, North Carolina who presented on an involuntary petition of a minor patient. He had been living at home and attending public school.

PRESENTING PROBLEM ON ADMISSION: Robert stated, "I've been staying with my girlfriend."

SUMMARY OF HOSPITAL STAY: Robert was admitted and evaluated medically and psychiatrically. His physical exam was normal for his age. His lab work showed a drug screen positive for marijuana at a quantitative level of 108. He had a normal serum glucose level, normal electrolytes, normal liver panel, normal cholesterol risk factors, normal thyroid function studies, normal white blood cell count, slightly elevated hematocrit and hemoglobin that was not felt to be clinically significant. He was originally on no medication. He was given Cogentin IM and p.o. after he had a reaction to Haldol he had been given in the emergency room. He stabilized in the hospital without medications and was discharged to outpatient follow-up.

CONDITION ON DISCHARGE: Mental status exam revealed him to be alert, well oriented, mood normal, affect appropriate. Not suicidal, not self-harming, not homicidal, not psychotic. Intellectual functioning and memory unchanged and in the average range. Chronic problems with drug use, conduct problems, and depression related to the consequences of his bad behaviors persist, but do not require acute hospital level of care at this time, however could result in unpredictable future need for acute hospital level of care.

DIET AND ACTIVITY: Regular.

PROGNOSIS: Guarded.

DISPOSITION: Home. Outpatient through the mental health center system.
